Evoqia

Digital Business Transformation

Evoqia
Portal

Creatio
formerly bpm'online

The Evoqia Portal is a thin web application allowing to expose your data online to customers and partners. By deploying a Self Service Portal you can provide 24/7 customer service.

The Evoqia portal has no underlying database but is instead real time connected to Creatio. All data and processes reside in Creatio and can be approached via the portal.

Key Features

- ◆ Attractive user interface in line with your corporate identity

- ◆ Real time, bi-directional sync with your Creatio instance

- ◆ All Creatio modules can be exposed on the portal

- ◆ Fully customizable and extendable to your requirements

- ◆ Developed in PHP, most common web language

- ◆ Easy user- and accessmanagement

Use Cases

The Evoqia portal facilitates the collaboration between your company and your customers / partners through digitalization.

Customers and partners can consult and modify their data, launch requests (e.g. purchases), create and track service tickets, etc. The result is a drastic increase of your internal efficiency, as well as increased customer satisfaction.

Bi-directional real time syncronisation

Your Evoqia portal follows the same setup as your Creatio instance.   You decide which information to expose, and which information can be modified.   The portal can be approached via any webbrowser. Look & feel according to your corporate identity:
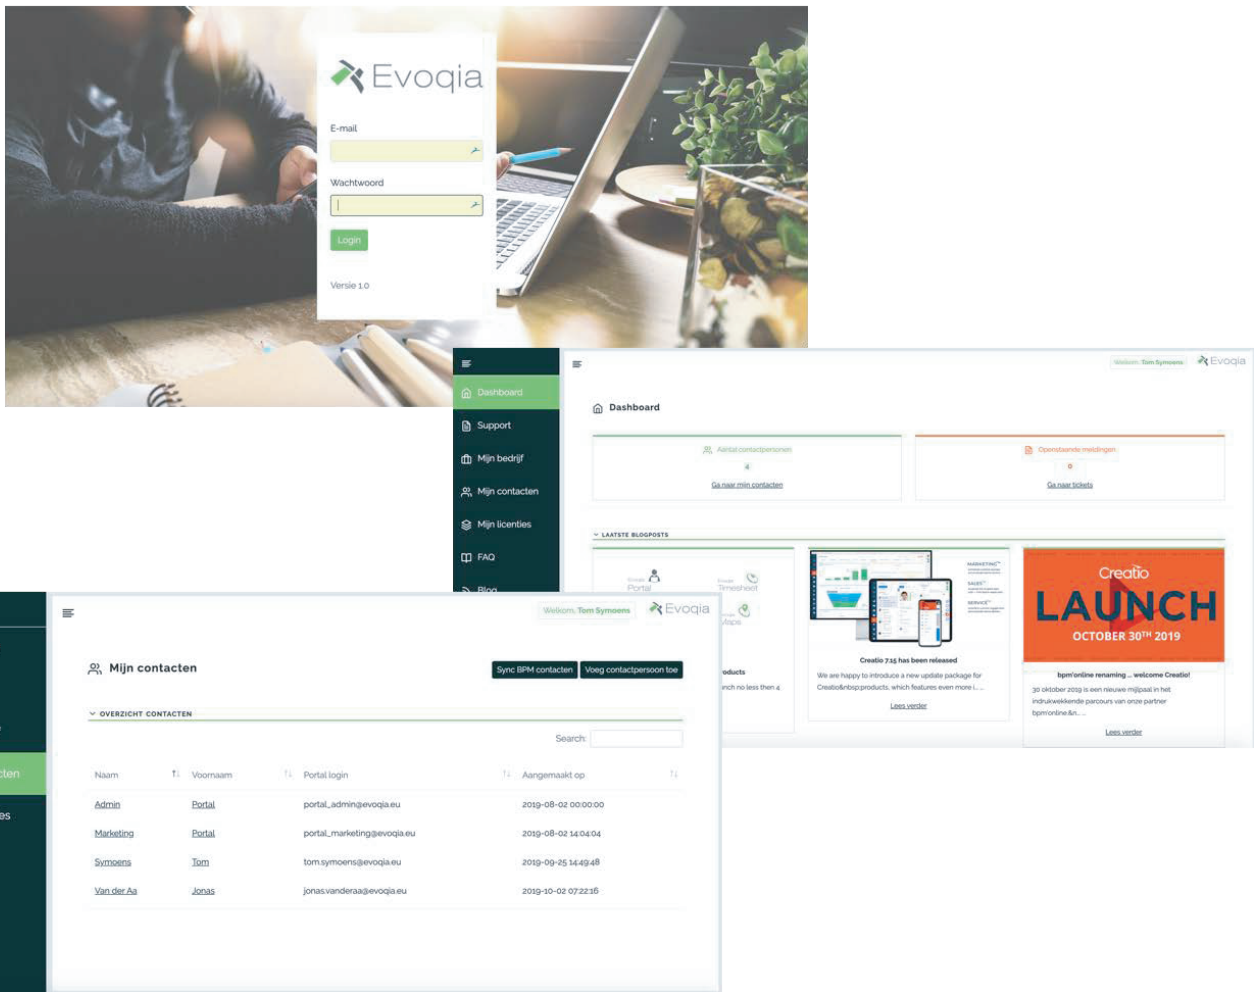

The Evoqia Portal is available As A Service (Saas) with hosting within the EU.   No customer data resides in the portal.

Pricing depending your specific requirements,   and the number of contacts having access to the portal.

Starting from 350 Euro per month, and 2.995 Euro start-up fee.

Creatio Modules:
- Accounts
- Contacts
- Contracts
- Quotes
- Custom
