

## Evoqia Timesheet

Evoqia Timesheet is an Add On to your Creatio instance allowing for time registration on projects. The Add On consists of two integrated components. Within Creatio you'll have a custom Projects Module allowing for creating and managing your timebased projects. Next there is a light web application allowing for time registration on Task level. Within Creatio you have a real time view on all time registrations by project making use of the embedded Dashboards & Analytics functionality.

### Key Features

- ◆ Custom Projects module adapted to your specific project management
- ◆ Light and fast web application allowing for time registrations
- ◆ External consultants without access to Creatio can log time using the web application
- ◆ Use pre-defined Project Templates for quick project creation
- ◆ Unlimited possibilities for dashboarding and analytics
- ◆ Manual or automatic invoicing from within Creatio, possibly with ERP integration

### Use Cases

Fully integrated Project Management & Time Registration solution for all time based businesses.

Benefit from 360° customer view, full customer life cycle

Allows for time registration by external consultants not having access to your Creatio

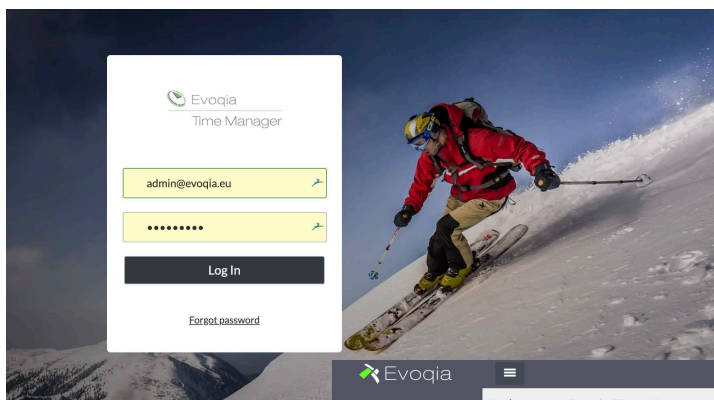

Drastically improve internal efficiency

Real time bi-directional synchronization

Create projects in your Creatio and within seconds the projects and related tasks come available in the web app for efficient time registration, progress tracking and invoicing:
